

## Research Bibliography

### INTERACTIVE METRONOME (IM) RESEARCH STUDIES

#### Published Papers 2013-2021

1. Bonacina S, Krizman J, White-Schwoch T, Kraus N. (2018). Clapping in time parallels literacy and calls upon overlapping neural mechanisms in early readers. *Annals of the New York Academy of Sciences*. doi.org/10.1111/nyas.13704
2. Bonacina S, Krizman J, White-Schwoch T, Nicol, T. & Kraus N. (2019). How Rhythmic Skills Relate and Develop in School-Age Children. *Global Pediatric Health*, 6, 1-7.
3. Enders, L.R., Boykin, G.L. & Rice, V.J. (2020). Effects of Neurocognitive Temporal Training on Weapon Firing Performance. *Perceptual and Motor Skills*. DOI: 10.1177/0031512520927508
4. Johansson, A. Demellöf, E. & Rönnqvist, L. (2014). Timing training in three children with diplegic cerebral palsy: Short- and long-term effects on upper-limb movement organization and functioning. *Frontiers in Neurology*, 5(38): 1-9.
5. Kim, K., Heo, S., Kim, M., & Lee, S. (2015). Validity of Long Form Assessment in Interactive Metronome® as a Measure of Children's Praxis. *The Journal Korean Academy of Sensory Integration*, 13(1), 1-21.
6. Kim, K., Kim, M., & Lee, S. (2015). The Effects of Interactive Metronome on Timing, Attention, Bilateral Coordination and Balance for Adult with Intellectual Disabilities: Single Subject Design. *Journal of Special Education & Rehabilitation Science*, 54(3), 349-364.
7. Kim, J.H., Han, J.K. & Han, D.H. (2018). Training effects of Interactive Metronome® on golf performance and brain activity in professional woman golf players. *Human Movement Science*, 61, 63-71.
8. Kim, J.H. & Ridgel, A.L. (2019). Effects of Interactive Metronome and golf swing mechanics training on technique and motor timing in professional and amateur golfers. *International Journal of Sports Science & Coaching*, 14(6) 786-797.
9. Kuhn, K.W. & Cambron, J. (2013). Chiropractic management using a brain-based model of care for a 15-year-old adolescent boy with migraine headaches and behavioral and learning difficulties: a case report. *Journal of Chiropractic Medicine*, 12, 274-280.
10. Nelson, L.A., MacDonald, M., Stall, C., & Pazdan, R. (2013, September 23). Effects of Interactive Metronome Therapy on Cognitive Functioning After Blast-Related Brain Injury: A Randomized Controlled Pilot Trial. *Neuropsychology*. Advance online publication. doi: 10.1037/a0034117.
11. Rönnqvist, L., McDonald, R. & Sommer M. (2018). Influences of Synchronized Metronome Training on Soccer Players' Timing Ability, Performance Accuracy, and Lower-Limb Kinematics. *Frontiers in Psychology*. doi: 10.3389/fpsyg.2018.02469
12. Rosenblum, S, & Regev, N (2013) Timing abilities among children with developmental coordination disorders (DCD) in comparison to children with typical development. *Research in Developmental Disabilities*, 34, 218-227.
13. Sommer, M. Häger, C.K., Boraxbekk, C.J. & Rönnqvist, L. (2018). Timing Training in Female Soccer Players: Effects on Skilled Movement Performance and Brain Responses. *Frontiers in Human Neuroscience*. doi: 10.3389/fnhum.2018.00311
14. Shank, T.M. & Harron, W. (2015). A retrospective outcomes study examining the effect of Interactive Metronome on Hand Function. *Journal of Hand Therapy*. Advance online publication. doi: 10.1016/j.jht.2015.06.003
15. Sommer, M., Häger, C. & Rönnqvist, L. (2014). Synchronized metronome training induces changes in the kinematic properties of the golf swing. *Sports Biomechanics*, Published online: 07 Feb 2014.
16. Taub, G.E., McGrew, K.S, & Keith, T.Z. (2015) Effects of Improvements in Interval Timing on the Mathematics Achievement of Elementary School Students, *Journal of Research in Childhood Education*, 29:3, 352-366, DOI: 10.1080/02568543.2015.1040563
17. Trujillo, L.G. (2017). The Effectiveness of Interactive Metronome® as a Restorative Modality to Improve Cognition and Motor Performance in Healthy Older Adults in Eastern North Carolina. *Journal of Neurology and Neuroscience*, 8(2), 1-4.
18. Trujillo, L.G. & Painter-Patton, J. (2015). The Validation of the Interactive Metronome: A Pilot Study Prior to Implementation for Post Deployment Service Members. *Journal of Neurology and Neuroscience*, 6(2:7), 1-7.
19. Woodruff Carr K, Fitzroy AB, Tierney A, White-Schwoch T, Kraus N (2017) Incorporation of feedback during beat synchronization is an index of neural maturation and reading skills. *Brain and Language*. 164: 43-52.
20. Yu, G., Lee, J. , Kim, S. & Cha, T. (2017). Effects of interactive metronome training on upper extremity function, ADL and QOL in stroke patients. *Neurorehabilitation*, 41, 161-168.

#### Published Papers 2001-2013

1. Bartscherer, P. M., & Dole, P. E. (2005). Interactive Metronome training for a 9-year-old boy with attention and motor coordination difficulties. *Physiotherapy Theory and Practice* , 257-269.
2. Beckelheimer, S. C., Dalton, A. E., Richter, C. A., Hermann, V., & Page, S. J. (2011). Brief Report Computer-based rhythm and timing training in severe, stroke-induced arm hemiparesis. *American Journal of Occupational Therapy*, 65, 96-100.

3. Burpee, J., DeJean, V., Frick, S., Kawar, M., Koomar, M., Fischer, D.M. (2001). Theoretical and clinical perspectives on the Interactive Metronome (IM): A view from a clinical occupational therapy practice. *American Journal of Occupational Therapy*, 55(2), 163-166.
4. Johansson, A. Demellöf, E. & Rönnqvist, L. (2012). Short- and long-term effects of synchronized metronome training in children with hemiplegic cerebral palsy: A two case study. *Developmental Neurorehabilitation*, 15(2): 160-169.
5. Jung, J. & Kim, S. (2012). The Effects of Interactive Metronome® on Bilateral Coordination, Balance, and Upper Extremity Function for Children with Hemiplegic Cerebral Palsy: Single-Subject Research, *Journal of Korean Society of Occupational Therapy*, 21(2).
6. Leisman, G. & Melillo, R. (2010). Effects of motor sequence training on attentional performance. *International Journal on Disability and Human Development* 9(4), 275-282.
7. Libkuman, T.M. & Otani, H. (2002). Training in timing improves accuracy in golf. *Journal of General Psychology*, 129(1), 77-96.
8. Ritter, M., Colson, K.A., & Park, J. (2012). Reading Intervention Using Interactive Metronome in Children With Language and Reading Impairment: A Preliminary Investigation. *Communication Disorders Quarterly*, Published online September 28, 2012. <http://cdq.sagepub.com/content/early/2012/09/24/1525740112456422>
9. Sabado, J.J. & Fuller, D.R. (2008). A Preliminary Study of the Effects of Interactive Metronome Training on the Language Skills of an Adolescent Female With a Language Learning Disorder. *Contemporary Issues in Communication Science and Disorders*, 35, 65-71.
10. Shaffer, R. J., Jacokes, L.E., Cassily, J.F., Greenspan, S.I., Tuchman, R.F., & Stemmer Jr., P.J. (2001). Effect of Interactive Metronome rhythmicity training on children with ADHD. *American Journal of Occupational Therapy*, 55(2), 155-162.
11. Sommer, M. & Rönnqvist, L. (2009). Improved motor-timing: effects of synchronized metronome training on golf shot accuracy. *Journal of Sports Science and Medicine* (2009) 8, 648-656.
12. Gordon E. Taub, Kevin S. McGrew & Timothy Z. Keith (2007). Improvements in interval time tracking and effects on reading achievement. *Psychology in the Schools*, 44(8), 849-863.

## White Papers

1. Alpiner, Neal. (2004). The role of functional MRI in defining auditory-motor processing networks. White paper presented at 65th Annual American Physical Medicine and Rehabilitation Conference, Phoenix, AZ.
2. Baker, K. & Trujillo, L.G. (2014). Efficacy of the Interactive Metronome® for Improving Attention in Veterans Returning to School Settings: A Pilot Study. White paper presented at 2014 National AOTA Conference.
3. Cason, C. (2003). Learning problems and the left behind. White paper presented at the National Association of Elementary School Principals, Anaheim, CA.
4. Damooei, J. (2011). Academic and Behavioral Improvements in 2nd-8th Grade Students in the Hardy Brain Camp Program: Report on the Hardy Brain Camp Pilot Study of the Boys & Girls Clubs of Greater Oxnard and Port Hueneme and the United Boys & Girls Clubs of Santa Barbara County. (White paper). Department of Economics, Finance, and Accounting, California Lutheran University
5. Diamond, S. J. (2003). Processing speed and motor planning: the scientific background to the skills trained by Interactive Metronome technology. Unpublished white paper. Interactive Metronome.
6. Etra, J.L. (2006). The Effect of Interactive Metronome Training on Children's SCAN-C Scores. Nova Southeastern University. An Applied Dissertation Submitted to the Fischler School of Education and Human Services in Partial Fulfillment of the Requirements for the Degree of Doctor of Speech-Language Pathology.
7. Frimalm, R. (2012). The Effects of Interactive Metronome Training on Female Soccer Players Timing Ability. (Unpublished doctoral thesis). Umeå University, Umeå, Sweden.
8. Gorman, Patrick. (2003). Interactive Metronome- Underlying neurocognitive correlates of effectiveness. Unpublished white paper. Interactive Metronome.
9. Grossman, H. & Brenner, M.E. (2012). Evaluation of the Hardy Brain Camp. (White paper). Gevirtz Graduate School of Education, UCSB
10. Jacokes, Lee E. (2003). Pathways Center final statistical analysis. Unpublished white Paper. Pathway Learning Center, Chicago, IL, Interactive Metronome.
11. Jones, LorRainne. (2004). Improving motor planning and sequencing to improve outcomes in speech and language therapy. 83rd Annual American Speech and Hearing Association, New Orleans, LA.
12. Kim, A. (2016). The effects of Interactive Metronome on cognitive, upper extremity function & balance for Parkinson's Disease. White paper. Department of Occupational Therapy, Graduate School of Kwangju, Women's University, South Korea.
13. Kim, P.J. (2016). Effects of Interactive Metronome (IM) training on motor timing, EEG, and putting performance in golf: A neuropsychological approach. White paper. Department of Physical Education, The Graduate School of Chung-Ang University, South Korea.
14. Kuhlman, K. & Schweinhart, L.J. (2002). Timing in child development. High/Scope Educational Research Foundation, Ypsilanti, MI: High/Scope Press.
15. Nsungung, Y., Son, D., & Kim, K. (2015). Effect of Interactive Metronome® Training on Timing, Attention and MotorFunction of Children with ADHD: Case Report. White paper. Sensory Power Children Adolescent Sensory Integration Research Institute, Department of Occupational Therapy, College of Biomedical Science and Engineering, Inje University, South Korea.
16. Peterson, S.B. (2016). Effect of Interactive Metronome on Understanding Spoken Language in Adults with Auditory Comprehension Impairments. White paper. Rocky Mountain University of Health Professions, Provo, Utah, USA
17. Sommer, M. (2014). Effect of timing training in golf and soccer players: skill, movement organisation, and brain activity. (Unpublished doctoral thesis). Umeå University, Umeå, Sweden.
18. Sommer, M., Häger, C., Olsson, C.J., & Rönnqvist, L. (2014). Timing training in female soccer players: Effects on motor skill and associated changes in functional brain activity. (Manuscript in progress). Umeå University, Umeå, Sweden

19. Tiecher, M. (2019). Profound Effects of Interactive Metronome and Brain Balance Exercises on a Subset of Children with Attention Deficit Hyperactivity Disorder. White paper. Department of Psychiatry, Harvard Medical School.
20. Tiecher, M. (2020). Effects of Brain Balance Exercises and Interactive Metronome on Children with Attention Deficit Hyperactivity Disorder Are Similar to the Effects of Stimulant Medication. White paper. Department of Psychiatry, Harvard Medical School.
21. Trujillo, L.G. (2013). A Collective Review of Completed Research Projects Evaluating the Effectiveness of the Interactive Metronome as an Occupational Therapy Intervention PO 5052. White paper presented at 2013 American Occupational Therapy Association Conference.
22. Trujillo, L.G. (2015). Effects of the Interactive Metronome on Memory Process and Balance with Aging Adults 60+ Population. White paper presented at ISNR 2015.
23. Trujillo, L.G., Alspaugh, L., Gant, S. & Garner, A. (2014). The Evaluation of the Effectiveness of Interactive Metronome Training in Older Adults, as a potential modality for Enhancing Skills Necessary for Driving. White paper. Department of Occupational Therapy, College of Allied Health Sciences, East Carolina University, Greenville, NC, USA
